lite

Pallet

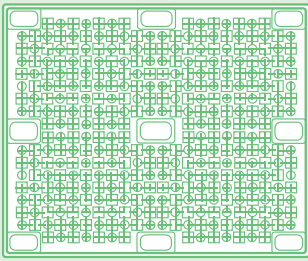

The pallets of the LITE range have a patented honeycomb cell structure. Available in different sizes, they are injection molded in recycled polyolefin resins.

- printed in recycled or not recycled polyolefin resins, or in other materials
- anthracite coloured and available in other colours (for food products)
- stackable and built-in
- forklifting on 4 sides
- washable and hygienic
- no fumigation required
- solid and humidity-resistant
- storable outdoor
- equipped with non-slip floor
- can be completed with various accessories (PP belt, injection molded lid etc.)
